

Mine Stopping Construction Protect Your Skin

Protect yourself when using cement or other similar products that could cause irritation to your skin or eyes during mine stopping construction.

Cement (wet or dry) or other caustic materials used is **caustic** to your skin and can cause **burns, rashes, and skin irritations**.

Protect your skin by doing the following:

- **Protect your hands when mixing and applying. Wear waterproof gloves to protect your hands.**
- **Avoid allowing cement to saturate your clothing.**
- **Wear eye protection.**
- **Use a brush or tool to apply the cement to stopping wall.**
- **Always read the material safety data sheet (MSDS) and familiarize yourself with safe work practices related to the material you are using.**
- **Avoid allowing the material to accumulate between your knee pads, shirt cuffs, gloves cuffs, and other similar areas.**

Rockwood Casualty Insurance Company (Rockwood) may provide safety management services to its insureds in order to reduce the risk of loss that may lead to insurance claims. The information and advice we provide is not intended to include all possible safety measures and controls. Rockwood does not warrant that losses and claims will be avoided or mitigated if our recommendations are followed. The safety management services we provide do not relieve the insured of its own duties and obligations with regard to safety matters, nor does Rockwood guarantee to the insured or others that the insured's property and/or operations are safe, healthful, or in compliance with applicable laws, regulations or standards. The insured remains responsible for its own operations, safety practices and procedures and should consult with legal counsel and safety professionals, of its own choosing, as it deems appropriate.
