## **Argo Group Provides Preliminary Estimate for Natural Catastrophe Losses During the 2018 Third Quarter**

**HAMILTON, Bermuda (October 18, 2018)** – Argo Group International Holdings, Ltd. (NYSE: ARGO), an international underwriter of specialty insurance and reinsurance products, today announced a preliminary pre-tax catastrophe loss estimate for the three-month period ended September 30, 2018 of approximately \$25 million. Catastrophe losses are related primarily to Hurricane Florence, Typhoon Jebi and other catastrophe and weather-related events in the third quarter of 2018. Catastrophe loss estimates include claims costs net of ceded reinsurance recoverables and reinstatement premiums, and include losses related to certain aggregate excess of loss contracts.

CEO Mark E. Watson III commented: “As we indicated following the catastrophe loss events in 2017, we restructured our reinsurance program for 2018 to incorporate a single retention that combined the reinsurance portfolios for Argo and the acquired Ariel Re, and we strategically increased our use of third-party capital. Our loss results for the third quarter of 2018 reflect these actions.”

### **ABOUT LOSS ESTIMATES**

Argo Group’s estimates of catastrophe losses are based on claims received to date, policy-level reviews, discussions with distribution partners, the company’s internal and external modeling resources, and publicly available industry loss estimates. Argo Group’s estimates are preliminary and dependent on broad assumptions about coverage, liability, reinsurance and potential changes to both known and unknown claims. Accordingly, the actual ultimate net impact attributable to catastrophes may differ materially from Argo Group’s preliminary estimates.

## **FORWARD-LOOKING STATEMENTS**

This press release may include forward-looking statements, both with respect to Argo Group and its industry, that reflect our current views with respect to future events and financial performance. These statements are made pursuant to the safe harbor provisions of the *Private Securities Litigation Reform Act* of 1995. Such statements are qualified by the inherent risks and uncertainties surrounding future expectations generally and also may differ materially from actual future experience involving any one or more of such statements. In addition, any estimates relating to loss events involve the exercise of considerable judgment and reflect a combination of ground-up evaluations, information available to date from brokers and cedants, market intelligence, initial tentative loss reports and other sources. The actuarial range of reserves and management's best estimate is based on our then current state of knowledge including explicit and implicit assumptions relating to the pattern of claim development, the expected ultimate settlement amount, inflation and dependencies between lines of business. Our internal capital model is used to consider the distribution for reserving risk around this best estimate and predict the potential range of outcomes. However, due to the complexity of factors contributing to the losses and the preliminary nature of the information used to prepare these estimates, there can be no assurance that Argo Group's ultimate losses will remain within the stated amount. For a more detailed discussion of such risks and uncertainties, see Argo Group's filings with the SEC. The inclusion of a forward-looking statement herein should not be regarded as a representation by Argo Group that Argo Group's objectives will be achieved. Argo Group undertakes no obligation to publicly update forward-looking statements, whether as a result of new information, future events or otherwise.
